

Patient Companion App

For digital communication
between patient and clinic

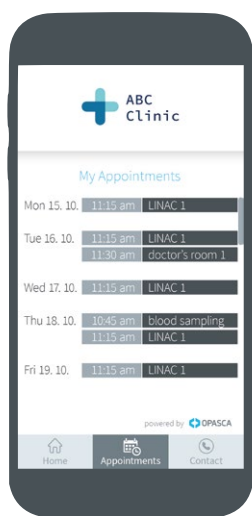

The OPASCA Patient Companion App is the ideal complement for your patient management

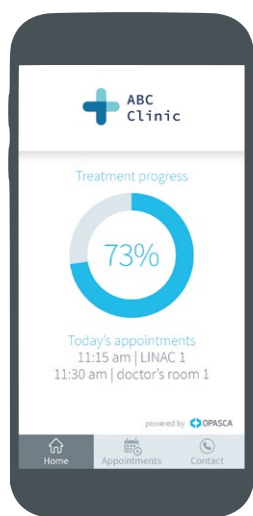

The OPASCA Patient Companion App accompanies your patients before, during and after the treatment process. The patients

always have an overview of their personal appointments and have their treatment progress in sight. You can easily inform your

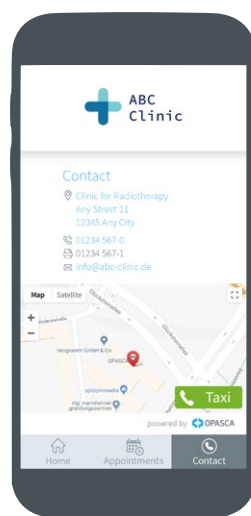

patients via push message as soon as an appointment needs to be postponed. In this way you avoid unnecessary waiting times.

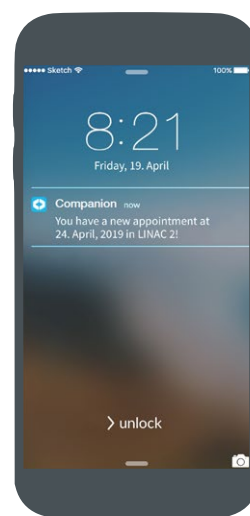

All appointments at a glance

A good feeling to have made it soon

All contact details of your clinic always available

Better informed for shorter waiting times

Download App

Scan the QR code in the clinic

All information available

OPASCA GmbH

Franz-Volhard-Strasse 3
